

On the Purpose of Humanity in the Universe

Glenn Tramm II, BICT, MBA, FRC

*“And **Judah** said unto his brethren, what profit is it if we slay our brother, and conceal his blood? Come, and let us sell him to the Ishmeelites, and let not our hand be upon him; for he is our brother and our flesh. And his brethren were content.”¹*

Scriptures is filled with interesting stories. Many of which will be read without the reader discovering the gist, the real underlying meaning, of the stories. In no way am I stating that I do understand everything these stories mean. Quite the opposite, I feel like we can derive many more lessons that till now has not yet been discovered. And, that many of our questions is being answered right before our eyes.

The story of Joseph is a well-known story of the Bible. If you ask me, among other stories in the Old Testament, this story is repeated again in the new testament with the story of the Master-Christ Himself. Here are some of the many parallels known to us thus far...

1 Genesis 37:26-27, KJV version

- Joseph had 11 (half) brothers and 1 sister (Dinah), totaling 12 siblings;
- Jesus had 12 disciples;
- Judah proposed the selling of Joseph;
- Judas sold the Christ;
- Joseph was sold for 20 pieces of silver;
- Christ was sold for 30 pieces of silver.

There are many more parallels that, if taken the time, will be a whole article of itself. The basic idea is that the stories brings with them a modality of thought, a frame through which we can understand history, and the future. This is an interesting idea considering that Joseph had two distinct dreams;

- In the first dream, Joseph and his brothers gathered bundles of grain, of which those his brothers gathered, bowed to his own.
- In the second dream, the sun, the moon, and eleven stars bowed to Joseph himself.

Many would conclude that these dreams imply Joseph's supremacy over his brothers. Although the story unfolds with Joseph being the 2nd in command beside the Pharaoh. Notice, being second in command does not constitute him in any way supreme, because he is second. The conclusion of a physical supremacy is derived from the individual's worldview that is based on fear. The idea that one should be controlled by another being is an act of fear. The idea is not the bowing down for a specific person or entity for that matter. Considering that we all are sovereign beings that have the right and obligation to govern over the mind, feelings, and actions of the Self. This principle of self-sovereignty is being attacked of its legitimacy as we speak. The principle idea is that all other, absolutely everything, bow to the model of the Christ, which is the figure that the character of

Joseph represents. This is the reason I brought this story to your attention with some of the parallels it contains with the story of the Christ.

Now, if we take the name of the Christ, which in Hebrew is read as יהוה “Yod He Shin Vav He”, read from right-to-left, which we transliterate as “Yoshua” or “Yehoshua”. From this name we derive the name “Jesus” in English. However, we will discover something newsworthy, from this name in a minute.

Zecharia Sitchin, and many others before him, have discovered the true origin of the human race, albeit many will not agree 100% with them. We can certainly say that the stories are intriguing to say the least. Sitchin, attributed *partly* the origin of our current “avatar” to the genetic manipulation of these beings which he termed based on his research the “Annunaki”. “Annunaki”, in Sumerian, means “those that came from the sky”. It is worth mentioning that the term is now used loosely to encompass all types of extraterrestrial beings, not only those dealt with in Sitchin’s works.

This is the part that things become interesting. The Bible is filled with the stories of these extraterrestrial beings and that include the story of Joseph. I am of course not implying that neither Joseph, nor the other avatars of the story, are these foreign beings. What I do want to reveal is the model, the structure, with the many subtle and clear messages of the story are conveyed. The name “Yoshua” or “Yehoshua”, which is also the model that Joseph represents, has a letter in the middle, which is the ש “shin”. The other four letters יהוה translated as “Yo He Vav He” can be attributed to the four main species that came from above which were discussed in the first chapter of Genesis, called אלהים - the Elohim, the Hebrew word for *gods*. Also, these four species not only represent the four elements, namely; water, air, earth and fire, but also the four corners of our world, namely; North, South, East and West. This is

a case made by some Rosicrucian work of antiquity. My proposal is to bring these four species even closer to our race. That is, the four main races; namely; the Black, White, Latin, and Asian race, of our current world, representing the four galactic species that directly influenced human history through the ages, but representing also the elements, and corners of our world. However, if we follow the story of Joseph closely, we will discover that there are 8 (12 - 4) more species probably, at least directly in relation to us totaling to 12 and making us the 13th specie in a sense.

All these are to prepare the mind for what I am about to unfold, that the human race is the Christ-race, the \cup - shin if you will. When the All-Father presented His answer for this universe, at least four of our half-brothers presented to each other the idea to kill but then resolved to enslave the Christ, Joseph, or us to be more precise. Afterwards, they killed us all through the flood, in similar manner the story tells that the Christ was crucified. This is what the discovery of Sitchin was all about, the unbelievable, and hidden story of the enslavement of our specie by these foreign beings.

Very particularly, one of the reason for this enslavement, according to Sitchin, was for gold; bringing the idea that we were sold in slavery and even killed for money, the same as Joseph and the same as the Christ.

But why?

The same as Joseph and the Christ, our purpose is to stand before the congregation of our brethren, and being literally blood related to all, can claim the rightful place as the Christ, the uniting force and conscience, among our brethren, throughout the Universe. Becoming the Mashiach Nagid, Prince beside God, therefore 2nd in command, throughout the Universe. The same idea that Joseph

was 2nd in command with the Pharaoh. This Christ, therefore us, is the physical representation of how we can live in love, and according to natural laws, with one another. And, that the idea of cohabitation for the general purpose of the All-Father is possible; a provocative thought to say the least.

There is only one problem with this thought – human race is not at the stage to become in anyways the rightful inheritor of this position. Considering that among ourselves, we have not even come to grasp the importance of the existence of our being on the earth, let alone in the universe. Our faculties and potentials are geared towards this purpose, but we are far from achieving the Christ-State. The purpose, once demonstrated on the micro-cosmos, which is on the individual level, can reach a harmonious cohabitation among our own specie, which is comprised of 4 main races that the Universe, once and for all can become at last One. This Oneness, as discussed in my previous work “On the purpose of Humanity on Earth” is what is called *Providence*. Think of it like this; do you really think that we will be allowed to go into space, with our current and low vibratory, and fear-based consciousness? Our world is in chaos to say the least, how dare we think that we can bring order to the universe, or even discover and/or manage foreign treasures, when we cannot even understand and/or manage our own? Therefore, all attempts to go into space will stay limited – and this is generous.

The only way out of this world is to become Christ-like, raising the vibration of our consciousness. This will make us switch from a fear-based consciousness to a love-based consciousness. Where respect for the animals, nature and ourselves become self-evident in our ‘modus operandi’. Therefore, one of the Delphic maxims, an ancient Greek aphorism, becomes more real than ever, viz.;

“Heed these words, you who wish to probe the depths of Nature: If you do not find within yourself that which you seek, neither will you find it outside. If you ignore the wonders of your own house, how do you expect to find other wonders? In you is hidden the Treasures of Treasures. Know Thyself [first] and you will know the Universe and the Gods.”

*To the
world, you might
be just an individual,
but for me, as one individual,
you are the world. We are One and
the same. Written with love. Peace Profound.*
